

NYX

Dedicated Night Vision Binocular

Two versions available:

NYX AE (Adjustable Eyepiece)

NYX FE (Fixed Eyepiece)

The lightest NV binocular in its category

Rugged and user-friendly design based on real user feedback

Binocular stereoscopic vision for greater depth perception

Optional Manual Gain Control

Integrated Infrared Illuminator

Independent Flip away & Flip up function – reduced silhouette

Enhanced sturdiness and ease of use dovetail design

25 mm eye relief for improved comfort

Smart electronics

Mounts available for a wide range of helmets including VAS shroud

Complete range of accessories including 3X magnifier, sacrificial, antifogging, day training, laser protection filters, camera adapters etc.

NYX is a cutting edge, full MIL-SPEC, image intensified, dual tube binocular that is able to be operated helmet-mounted, head-mounted or hand-held. It offers better depth perception than single tube systems making it easier to judge distances and relative motion so the ability to perform tasks such as driving is greatly improved. NYX is the ideal choice for special operations forces.

For momentary configuration changes, the user can flip away each monocular separately. With both monoculars flipped away and flipped up, the system stows along the contour of the helmet thus reducing its silhouette and neck strain, minimising the danger of system damage.

NYX features self-contained single AA battery power and can be also operated via a remote battery pack at the rear of the helmet for increased operational life.
